Education

BMS Institute of Technology and Management, BE in Electrical and Electronics

Nov 2022 - Apr 2026

Summary

Product-focused engineer with experience across consumer tech, AI, and B2B SaaS, including 0-to-1 product development. Skilled in product discovery, user research, PRDs, feature prioritization, A/B testing, analytics, and cross-functional execution to build and improve products that solve real user needs.

Experience

ZEPTO - Product Operations Specialist (shopping experience), Bengaluru

May 2026 - Present

- Built an AI-powered Event Helper that unified homepage event setup, creative updates, previews, validation, and production rollout into a single UI, reducing launch time by 30 minutes/event, manual effort by 80%, and scheduling errors by 90%.
- Built SQL-based validation frameworks for widget configuration, deeplink verification, scheduling, and launch QC, improving reliability of high-volume homepage launches.
- Owned execution of experiments and category launches across Electronics, Fashion & FMCG, partnering with business, design, and engineering teams to improve shopping experience.
- Owned 25+ homepage merchandising campaigns across FMCG, Electronics, Fashion, and Seasonal categories, driving 20M+ impressions and 1.5M+ clicks through data-driven decisions.

SUPERSET - Product Intern, Bengaluru

Nov 2025 - Apr 2026

- Owned Superset Pro workflows across SME hiring, assessments, candidate shortlisting, and recruitment execution.
- Analyzed 150+ assessment sessions to identify user friction, platform misuse, and assessment integrity issues.
- Built VIBE - an AI-assisted assessment integrity system using computer vision and behavioral signals to flag suspicious sessions for review.

UNACADEMY - CS Intern - Bengaluru

Sept 2025 - Nov 2025

- Analyzed user engagement and behavioral data to identify friction points and opportunities in AI-powered learning.
- Contributed to PRDs, user research, and cross-functional product execution.

Products

Vision AI - 'Real-Time AI Interview Assistant' (AI SaaS Product)

2026

- Defined product roadmap, feature prioritization framework, and success metrics for an AI-powered interview assistant.
- Conducted user research with 35+ candidates to validate problem statements and prioritize MVP features.
- Built a working MVP using React, Node.js, and Google Gemini API enabling live transcription and interview insights.

AI - Smart Attendance Management System - (Founder & Strategist)

2024-2025

- Built a computer vision-based attendance system end-to-end to address inefficiencies in manual attendance tracking.
- Implemented automated attendance logging with timestamp tracking and Excel export functionality.
- Built an analytics dashboard enabling administrative monitoring and decision-making.

Skills

- **Product Management:** Product Discovery, User Research, PRDs, Product Strategy, Roadmapping, Feature Prioritization, Experimentation, A/B Testing, Product Analytics, Stakeholder Management
- **Analytics:** SQL, Mixpanel, Google Analytics, Power BI, Excel
- **Technical:** Python, REST APIs, JavaScript, React, HTML/CSS, GitHub
- **Tools:** Figma, Notion, Slack, Webengage, n8n, Postman

Achievements

- Winner - **Anveshana-Ideathon:** Developed an AI-driven Smart Wardrobe project (Data & AI-based solution).
- Top Prize - **EPOCH'24 Hackathon:** Built WellFi - AI Companion for Yoga & Meditation.
- Led 5+ global projects, improving UX and generating **INR 2,00,000+** revenue through data-driven strategies.
